DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group **1**, claims **1-87** are drawn to a phase splitter and method for generating first and second complementary output clock signals from an input clock in which the first output clock signal is generated from a first branch of an even number of series connected inverters, and the second output clock signal is generated from a second branch of an odd number of series connected inverters, and the output of an inverter in one of the branches to an input of an inverter in the other of the branches;

Group **2**, claims **88-89** are drawn to a method of scaling a circuit having at least a first logic component driving a second logic component which includes the steps of "downwardly scaling first logic component", "downwardly scaling second logic component to a greater extent than the scaling of said first component so that the second component is scaled to a greater extent than first component", and "coupling an electrical loading component to the output of first component, the electrical component being unconnected to any other portion of the circuit, the electrical loading component maintaining the timing relationship".

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Q Nguyen whose telephone number is (703) 308-4897. The examiner can normally be reached on 7am-6pm (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on (703) 308-4910. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
